**Phone:** 416-668-1415

**Email:** Tonyli.0923@gmail.com

FULL STACK DEVELOPER. I really enjoy learning, and web development is lifelong learning career path. Being self-motivated and a quick learner I am able to pick up new skills swiftly such as new programming languages and new technologies. I have also played lots of sports which has really taught just what it means to work effectively with other people and with that being combined with my easy-going nature and approachability means that I thrive in team environments

## EXPERIENCE

### **Canadian Property Stars, Calgary— Sales representative**

June 2017 - August 2017 - worked 7 days a week

Employees were each dropped off at their own section of a neighborhood, which we would then work for 12 hrs straight to sell our window washing service. In a Commission based job in which if you made zero sales you would lose \$10 for 12 hrs or work; I had an average earning of \$200 a day.

### **PWC Junior Achievement, Calgary — Product Manager**

September 2015 - January 2016

Overlooked and lead a team of 10 that would be in charge of the production of our product. Ensured we were using our resources as efficiently as we could, which over all helped lead our team to achieve an ROI of over 300%.

## Languages/Frameworks

- JavaScript
- Python
- React
- PostgreSQL
- SQL
- Redux
- Django
- HTML5
- CSS
- Git/Version control

## Projects

Real-estate Application - <https://tonylihouse.herokuapp.com/#/>

Full stack web application made with React/Redux on the front end and used Django-Rest-Framework to create a rest API on the backend. Implemented token authentication with Django and managed it with redux on the React front end.
